

Set a Due Date for a Discussion

When creating a discussion post, you can set a start & end date but you do not have the option of setting a due date. But there is a way.

After you have created your discussion, add it to a content area. You can “Edit Properties in Place” where you will have the option of setting a due date.

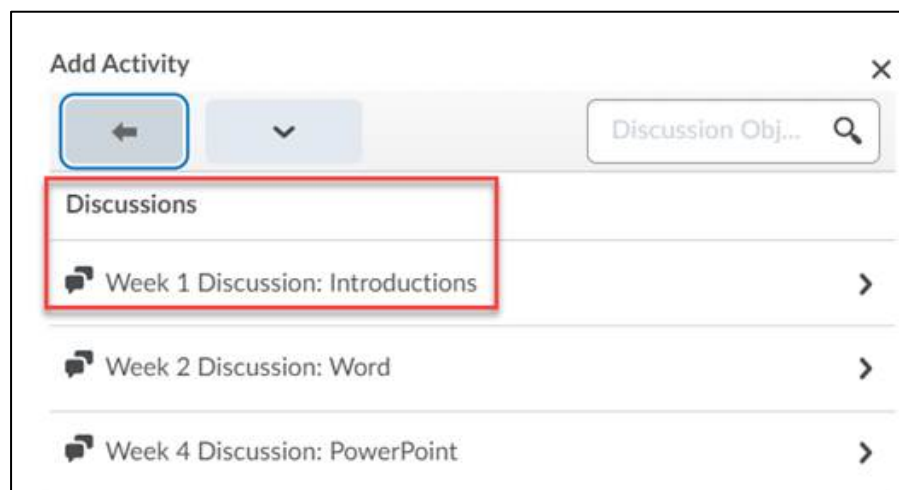

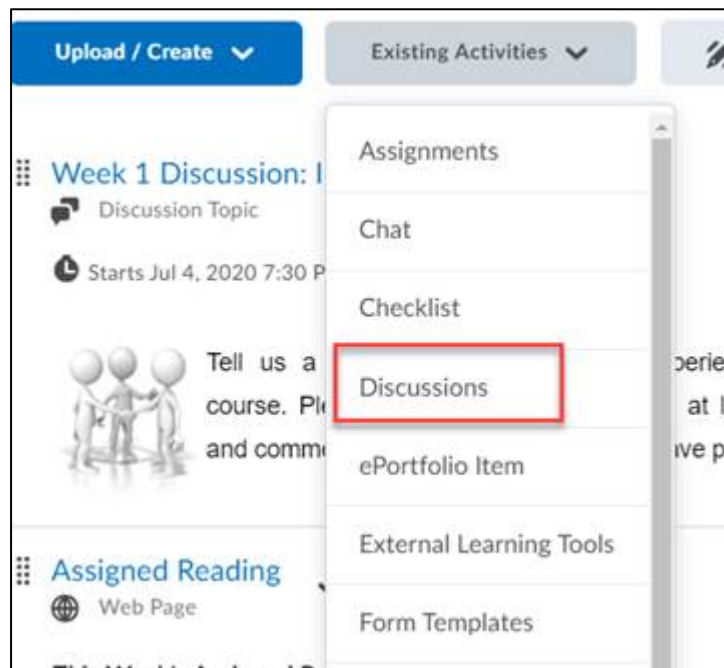

Here’s how:

Go to the content area where you want your discussion posted.

Click “Existing Activities” – Choose “Discussions” – Choose the discussion you want placed in the content area. Once clicked, it will automatically be placed.

You now can set the due date by clicking the upside down arrow next to the discussion topic and choose “Edit Properties in Place”.

Click “Add dates and restrictions” and here you can set the Begin, End AND Due date.

- **Start** dates – When the discussion is available for students.
Note: If you do not put in a start date, the discussion will not be visible to students.
- **End** dates – Students can see the discussion listed, but it's greyed out and unclickable.
- **Due** dates – Will not prevent the student from submitting, but they will be flagged in red as being late.

All the above dates also apply to assignments & quizzes
