

Allow Students to View Their Quiz Results

By default, students see neither the questions nor their answers after they submit a quiz. You can release that information to them by modifying the default submission view.

1. Select **Quizzes** from the course navbar.
2. Click on the quiz name. You do not need to choose the dropdown and choose "Edit".
By clicking on the quiz name it brings you automatically to the "**Assessment**" tab.
3. You must "allow attempt to be set as graded immediately upon completion" if students are to see the Submission view upon submitting their quiz.
4. Select the **Submission Views** tab.
5. Click the Default View link.
6. If you wish, you can change the default message that students receive upon submitting their quiz.
7. Select either Yes or No, to determine if students will be able to see the questions after they submit a quiz.
8. Click the **Save** button to save your Submission View.
9. Click the **Save** and **Close** button to save your quiz.

Note: If you plan to manually grade any part of the quiz, Brightspace recommends that you do **not** select the Show question score and out of score or the Show attempt score and overall score options. If these options are selected, the score shown to participants will reflect the zeroes Brightspace assigns to questions it cannot auto-grade.
