

ReadSpeaker

Research indicates many learners can benefit from consuming content in multiple ways. The automated support for having content spoken aloud is a tremendous accessibility benefit, assisting users that have reading disabilities, are new to a language, or that simply learn better by listening.

ReadSpeaker WebReader automatically speech enables course content within Brightspace, campus wide, on the fly and provides a suite of audio-enhanced learning tools.

- **Website:** [Using ReadSpeaker](#)
- **Support Site:** <https://www.readspeaker.com/support>
- **Text to Speech with Simultaneous Highlighting** - Reads the content of web pages out loud. The words and sentences being read are highlighted in separate colors, making it easy to read along as you listen.
- **Translation** - Translate a selected text to a number of languages and have the text read in the target language
- **Settings** - Personalize reading speed, highlighting colors, and more.
- **Dictionary** - Select a word and find its definition.
- **Read on Hover** - Hover over a paragraph of text and it will read aloud automatically.
- **Text Mode** - View a clutter-free version of the web page with text in your preferred font, size, and colors.
- **Text Selection** - Select a text and click the listen icon that appears.
- **Page Mask** - Horizontal bar that can be moved along with the reading to bring out the lines being read by shading the rest of the screen.
- **Enlarge Text** - Text being read is displayed at the bottom of the page in large font size
- **Mp3 Download** - Download an audio version of your content for offline listening
- **100% cloud-based** - Means no downloads necessary.
