

YCCC Online Guide

It is always a good idea to backup copies of any prepared teaching materials in case you are unable to access the files on your computer. Storing items like PowerPoints, lecture notes, assessments, etc. in cloud-based storage can ensure your files are safe and you always have access to these items.

Here are a few free cloud-based storage options:

1. Google Drive - [Google Drive Tutorial](#)
2. One Drive - Free with Office 365 - [OneDrive Tutorial](#)
3. Dropbox - [Dropbox Tutorial](#)

If you do not have Microsoft Office for your home computer, as an employee of YCCC you may download Office 365 for free. [How to download and install Office 365](#)

Find Brightspace!

You can find Brightspace here: <https://mccs.brightspace.com/d2l/login>

All faculty have access to Brightspace using their YCCC login. If you do not see your course in Brightspace, please contact [Maureen Simmons](#).

How to get around Brightspace.

- [Brightspace Quick Start Videos](#)
- [Brightspace Subscription Training Videos](#)

My Brightspace course is empty. How do I get folders and tools from my previous course?

- If your course happens to be empty, please contact [Maureen Simmons](#) for assistance to have a previous course copied into your empty course.

Delivering Lectures: You can deliver lectures and presentations in Brightspace either synchronously or asynchronously.

Asynchronous Lectures:

- Post Microsoft PowerPoints as lecture slides into Brightspace.
 - [How to use PowerPoint.](#)
 - [How to upload a PowerPoint to Brightspace](#)

Use Publisher PowerPoints as Lecture Material. Many textbook publishers have PowerPoints available in their Instructor Resources.

- PowerPoint too complicated? Use Microsoft Word: You can use Word to type up and post lecture notes.
 - [How to use Word.](#)
 - [How to upload a Word file to Brightspace](#)

Recorded Videos/ Lectures: Faculty can make screen recordings of their lectures using either Panopto or ScreenCast-O-Matic software that is integrated in Brightspace. Faculty will need a microphone and webcam if on a PC without a built-in mic or camera, or a laptop to record a video.

Panopto - *Best Choice

Panopto is integrated in Brightspace and can record, store, edit, share and upload existing videos and has the ability to create captions automatically.

- [Panopto Webinar Training](#)
- [Panopto Video Tutorials](#)

ScreenCast-O-Matic

First you need to set up your account in Screencast. YCCC has a paid subscription. Use your YCCC login email and password. Sign into the following site using the provided password.

- https://screencast-o-matic.com/yccc_2020
Password: Yccc/2020/BS\$
- [How to use ScreenCast-O-Matic in Brightspace](#)

Synchronous Lectures

Meet virtually to hold online real-time, interactive classes and office hours. This allows you to share your screen, poll students, live-chat, and open breakout rooms for smaller discussions. These sessions can also be recorded for those that cannot attend a synchronous class. For faculty and students to participate they will need a computer and a microphone or phone for an audio source.

- [Brightspace Virtual Classroom](#)
- [Zoom](#)

Communicating with your students on where to find the virtual classroom.

- Brightspace Announcements will post a message in your course.
- If your students need an orientation to Brightspace, please send your class to this Online Learning link [Brightspace Orientation for Students](#)

Handouts, study guides, etc.

- In Brightspace, you can upload files, including DOC, DOCX, HTM, HTML, MP3, MPG, PDF, PPT, PPTX, XLS, XLSX, RTF, TXT, ZIP, and most image types.
- You can also provide links to anywhere on the internet, including case studies, videos, websites, etc.

Assessing Students

Use Brightspace to collect, grade, and return assignments electronically. Brightspace can collect papers, PowerPoint presentations, spreadsheets, video, and other digital material. Faculty can provide a student with an assignment and then the student can upload a paper or other work to the assignment for grading.

- [Create Assignments & Assess Submissions](#)
- [Creating & Managing Quizzes](#)

Plagiarism Checker

Urkund is an automatic text-recognition system made for detecting, preventing and handling plagiarism, regardless of language. URKUND is integrated within Brightspace and can be found by under “Assignments” on the navigation bar.

- [URKUND Plagiarism Checker](#)

Group/Classroom Work

Faculty can use the Brightspace Discussion board to conduct classroom discussions or classroom activities.

You can also create “private” discussions which can only be viewed by the instructor

Discussions can be a writing prompt for a discussion, but it can also be a performance-based activity.

- [Interact & Engage with Learners](#)
- [Alternative Discussion Board Activities](#)
- [Create private and group chat rooms](#)

Attendance: For online classes, students only logging into the course is not sufficient by itself to demonstrate attendance. Students must have participated in a “academically-related” activity to be counted present. At a minimum, students should complete and upload academic work every week to count for attendance.
