

Releasing Grades Manually

Sometimes grades do not release automatically. However, you can release them manually. Here are the steps to do that:

1. Go to **Grades**, then **“Enter Grades”**.
2. Click the drop down next to **“Final Calculated Grade”** choose **“Enter Grades”**.
3. On the next screen Check the button to the left of **“First Name, Last Name”** then click **“Release/Unrelease”**.
4. You should now see a check mark in the Release/Unrelease column for all students.
5. Save and Close and now the eyeball next to each student should display without a slash.
