

Releasing Up-To-Date Grades for Students

By default, Brightspace does not show students their current grade in your class until you release it. This can be done at any time with these steps:

1. Go to **Grades**, **Manage Grades** then **Settings** in the upper-right.
2. On the **Calculation Options** tab, scroll down and check "**Calculated Final Grade**", "**Automatically release final grade**" and "**Automatically keep final grades updated**".
3. Check "**Drop ungraded items**" or students will see a failing grade on day one.
4. If you choose change "**Final Calculated Grade**" title on the **Enter Grades** page by clicking **Edit**.
5. The grades will be released to all students in the course as soon as the next new grade comes in.

If you do a course copy to a future semester, this setting will be kept, so you only have to do it once!

The screenshot illustrates the process of releasing up-to-date grades in Brightspace. It is divided into three main sections:

- Top Navigation:** Shows the 'Manage Grades' tab with sub-tabs for 'Schemes', 'Setup Wizard', 'Settings' (highlighted with a red arrow), and 'Help'.
- Calculation Options:** A red arrow points to the 'Calculation Options' tab, which is selected. It shows settings for 'Personal Display Options', 'Org Unit Display Options', and 'Calculation Options'.
- Final Grade Released:** A panel on the left with the title 'Final Grade Released'. It contains two sections:
 - Release:** Radio buttons for 'Calculated Final Grade' (selected) and 'Adjusted Final Grade'. A checkbox for 'Automatically release final grade' is checked.
 - Grade Calculations:** Radio buttons for 'Drop ungraded items' (selected) and 'Treat ungraded items as 0'. A checkbox for 'Automatically keep final grades updated' is checked.
- Table and Edit Panel:** A table displays student grades. The first row shows 'Baggins, Bilbo' with a grade of '35 / 35, A'. A red box highlights the 'Edit' button next to the grade. A dropdown menu is open, showing 'Enter Grades' and 'View Statistics'.
- Edit Calculated Final Grade:** A panel on the right with the title 'Edit Calculated Final Grade'. It has two tabs: 'Properties' (selected) and 'Restrictions'. Under 'Properties', there is a 'General' section with a 'Name *' field containing 'Grade to Date' (highlighted with a red arrow).
