

Customize the “Teacher Profile” Widget

Instructors can customize the “Teacher Profile” widget located on the course homepage. This is a great way to introduce yourself to your students and provide additional contact information as needed. Follow the directions below to customize the “Teacher Profile” widget.

The image below is the default view that appears in every new course shell. This is confusing to some students because the widget indicates that their instructor’s name is Mike. Click the 3 dots in the upper right to edit the widget.

Change the background color by clicking the paint bucket to match the new YCCC branding. The color code is #0a2240.

Upload your image, add your name and information about yourself. Now students will no longer be confused about the name of their instructor.
